

GIS Instructions

Installing the right environment and packages

Anaconda Powershell Prompt

- We will use several special Python packages to process geodata and to interact with geodatabases. The following list is not comprehensive:
 - os
 - geopandas
 - shapely
 - sodapy
 - matplotlib
 - json
 - requests
 - etc.
- Create a new Anaconda environment. Do NOT install the packages in the base environment, e.g.

```
conda create -c conda-forge -n geo python=3
conda activate geo
conda install -c conda-forge ... (or pip install
```

(For more information, see the file attached

conda-cheatsheet.pdf

).
