

# ESP32Copter Design

Our design is named **ESP32Copter**. It is mainly inspired by **Espressif's ESP Drone** design. We change some parts and add others. The chip crisis is a big challenge! Many parts are not available.

# ESP32Copter Bill of Material (BOM)

We are planning to use some other components. The column **Ideal Part** lists the components we would like to use but which are partly unavailable because of the chip crisis. The column **ESP Drone Part** is the ESP Drone reference design by Espressif, version 1.2. The column **ESP32Copter Part** shows the selection of our current design.

The original BOM (xlsx) can be found [here](#)

The following lists are not complete and still under construction!

## Main Components: MCs and Sensors

Function	ESP32Copter Part	ESP Drone Part	Ideal Part	Source
main controller	ESP32 Wrover	ESP32 Wrover	ESP32 Wrover	<a href="https://www.reichelt.de/de/en/wifi-smd-module-esp32-d0wd-v3-16-mb-spi-8-mb-psram-18x31x3-3-esp32-wrover-ie-p300207.html">https://www.reichelt.de/de/en/wifi-smd-module-esp32-d0wd-v3-16-mb-spi-8-mb-psram-18x31x3-3-esp32-wrover-ie-p300207.html</a>
IMU, 6 DOF		MPU-6050		old design
IMU, 9 DOF			ICM-20948	not available
