Zechenfunk - LoRaWAN in the EOLab

Our current activities

Zechenfunk

We have deployed two LoRaWAN Gateways on top of the big former coal mine tower in the center of Kamp-Lintfort. The gateways with two antennas each are located at the south-west corner (aka south) and the north-east corner (aka north) of the tower's balcony.

The gateways are part of **The Things Network (TTN)**. The two TTN Mapper views below show some range tests for the two gateways. North Gateway

South Gateway

TTN Mapper is a community project and so needs to be financed in some way. That is why you see some ads below the map.
