Zechenfunk - LoRaWAN Gateways in the Coal Mine Tower

Our current activities

Zechenfunk

We have deployed two LoRaWAN Gateways on top of the big former coal mine tower in the center of Kamp-Lintfort. The gateways with two antennas each are located at the south-west corner (aka south) and the north-east corner (aka north) of the tower's balcony.

The gateways are part of **The Things Network (TTN)**. The two TTN Mapper views below show some range tests for the two gateways. North Gateway

South Gateway

TTN Mapper is a community project and so needs to be financed in some way. That is why you see some ads below the map.
