

Introduction to IoT

[Introduction to IoT - Sensors and Data processing](#)

Setup Development Environment

- [Install Arduino IDE](#), for more information see the [Official documentation](#)
 - [Installing ESP8266 NodeMCU Board in Arduino IDE 2.0](#)
- [How to install CH340 driver](#)

Hardware Review

- Dev Board: Wemos D1 Mini
- Microcontroller: ESP8266 12-E Chip [ESP8266 hardware review](#)

Coding Warm-up

Basic blink example:

[Blink.ino](#)

```
void setup() {
  // initialize digital pin LED_BUILTIN as an output.
  pinMode(LED_BUILTIN, OUTPUT);
}

// the loop function runs over and over again forever
void loop() {
  digitalWrite(LED_BUILTIN, HIGH); // turn the LED on (HIGH is the
  voltage level)
  delay(1000); // wait for a second
  digitalWrite(LED_BUILTIN, LOW); // turn the LED off by making the
  voltage LOW
  delay(1000); // wait for a second
}
```
