

Adiel-Shaquille Batson (adiel001) - Public Page

This public page *user:adiel001.txt*, as stated by it's name, **can be read by anyone but only you can edit it** (or a superuser)...

- You can introduce yourself, add links to your contributions in this wiki, tell a story or present your other works
- Think about [netiquette](#) 

Limitations:

- You shouldn't create any other page in that namespace *user:adiel001*
- Only a superuser can add a picture

Building Optimization

A. Batson (28067), A. Akuri (29630), G. Ciobanu (29427)

(AMC 2022 Project can be found here [Building Optimization](#) . Until the page is available, edits will be made here.)

1.0 Introduction

As the urgency to mitigate and combat climate change grows, more and more solutions are required to foster a more sustainable world. On the radar for these solutions, energy conservation and consumption reduction techniques comprise a significant measure in realizing greater sustainability in home & industry. However, one of the greatest limitations in realizing these developments is human contingent, for example forgetting to turn/off lights and heating. This project targets energy use optimization by smart control of lights and heating use in prototype designed to simplify a building.

By utilization of a microcontroller, a relay and two sensors to record, interpret values and automatically perform specific actions in order to minimize wastage of energy (O'Brien & Athienitis, 2015).
