

Mini Drones

Page	Image
Object Detection with Mini Drones	 The diagram illustrates the setup for object detection using a mini drone. On the left is a Tello EDU drone, and on the right is a Jetson Nano development board. A dashed line labeled 'WiFi Streaming' connects the drone to the board, and another dashed line labeled 'Control Commands' connects the board back to the drone. A small icon of a drone is labeled 'WiFi access point'. Below the Jetson Nano is a box labeled 'Object Detection' with a gear icon.
Mini Drones and Snap!	 A photograph of a black quadcopter drone with a camera mounted on the bottom. The drone is resting on a white surface, and its four propellers are visible.
