

Mini Drones

Page	Image
Object Detection with Mini Drones	 The diagram illustrates the setup for object detection on a mini drone. On the left is a Tello EDU drone. On the right is a Jetson Nano development board. A dashed line labeled 'WiFi access point' connects the drone to the board. Another dashed line labeled 'Video Streaming' and 'Control Commands' connects the board back to the drone. The Jetson Nano board has a label 'Object Detection' with a gear icon.
Mini Drones and Snap!	 A black and white photograph of a Tello EDU drone resting on a white surface. The drone is a quadcopter with four propellers and a camera mounted underneath. It is positioned in the center of the frame, with its arms extended.
